IF IN DOUBT ASK - DO NOT SCALE DRAWING

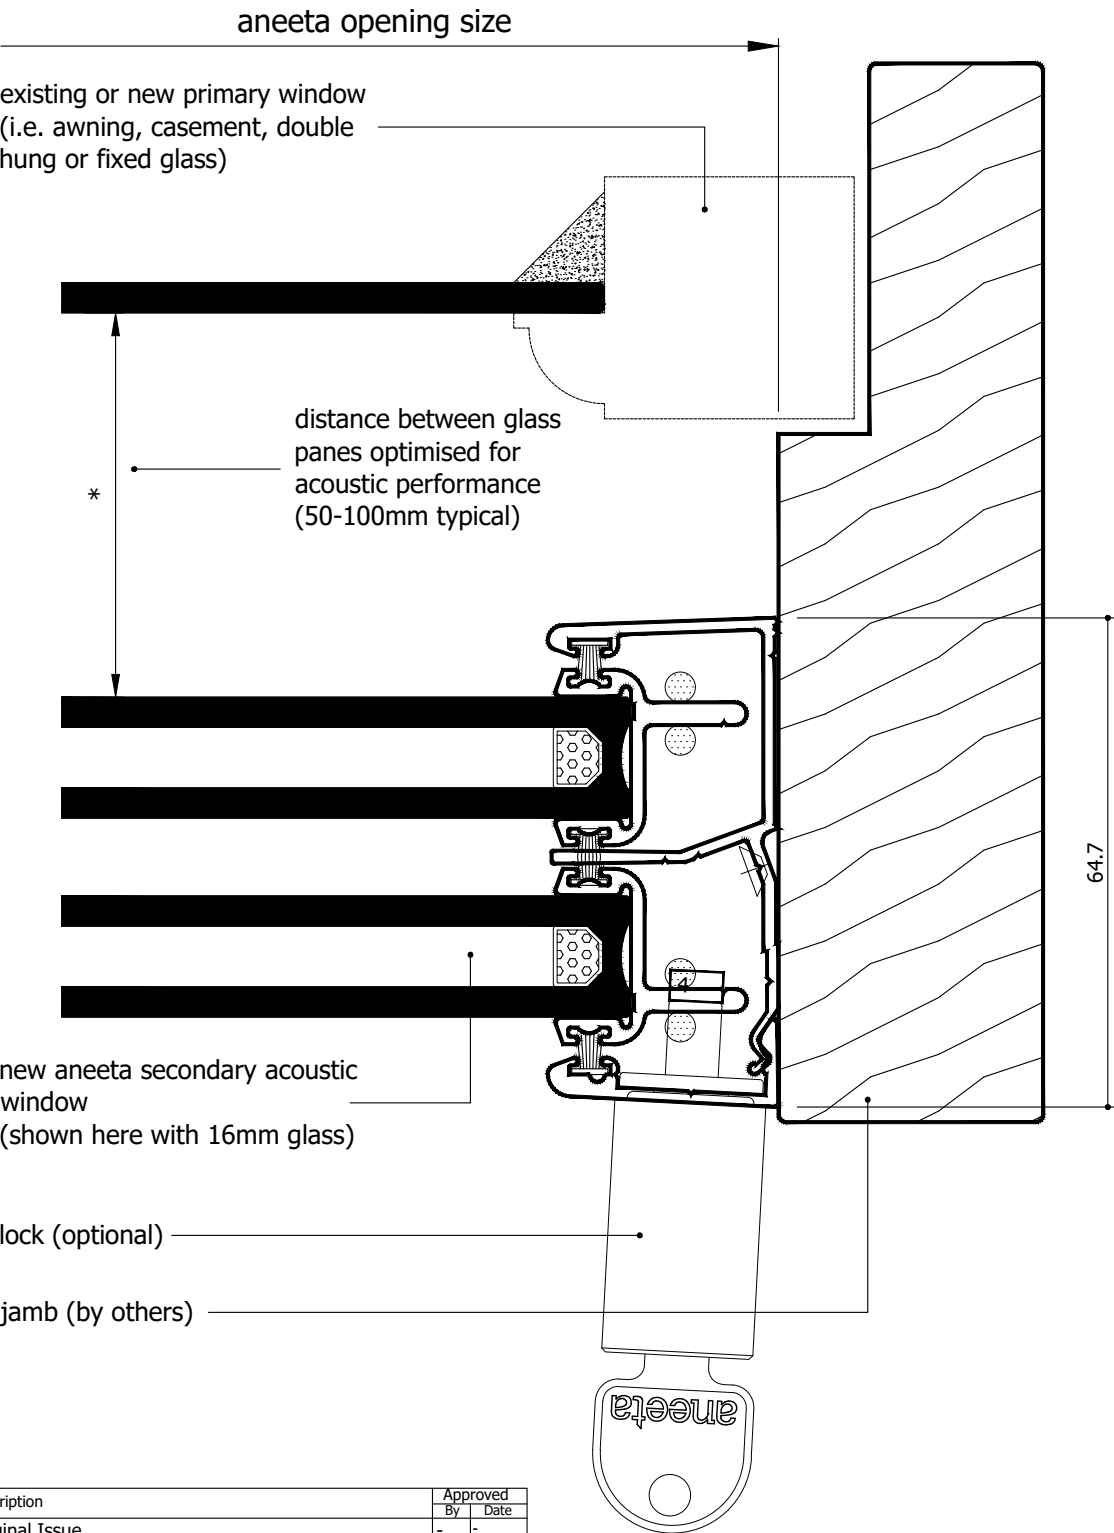

aneeta acoustic units can either be used as stand alone units, or are more commonly fitted as secondary units to existing or new windows. They can be fitted into the frame or reveals of other types of windows, on either the inside or outside face. They have been NATA tested to australian standards as specified on the Sydney Aircraft noise Insulation Project (SANIP), STC achieved up to 33 (stand alone sashless unit). Fitted as a secondary window would achieve a combined STC higher than this (>40).

glass width = opening - 40mm
