Window Systems will be quoted by Breezway (standard order forms are available to speed up the quoting process and to eliminate errors of interpretation) or online quoting is available through the BOB Online system. Alternately, pricing can be manually calculated using the steps below.

STEP 1: Select Frame Type & Size and Louvre Gallery Features

1. Choose the wind loading and water rating applicable to the relevant Australian Standards.
2. Select the Louvre size of 102mm, 152mm or IGLU Clips.
3. Select 102mm or 152mm clips to suit 6mm thick blades.
4. Select the Altair Louvre features required – See Features Table below.
5. Select the frame size and dimensions to determine whether a Standard or Special frame is required.*
6. Select the configuration of the window e.g. Louvre / Fixed Lite / Louvre (We view from inside out).

* Special Frame heights that are more than 5mm greater than or more than 5mm less than a Standard Frame Height will have a top fixed blade. IGLU System Standard frame heights must be exact. The minimum glass extension blade height is 40mm. Any extensions requiring a lesser height will be provided as an aluminium blade in the same finish as the Breezway frame.

Standard Frame Price	Special Frame Price
Standard frame width and Louvre gallery height (IGLU available in standard heights only).	Off-Standard frame height (not available with IGLU).
Black handles and clips for all finishes, except white handles and clips for Pearl White and Architectural White, and gull grey handles and clips for Anodised (Clear) 25µm.	
Keylock (not available with remote control handles, handle locking bar or Innoscreen Window System).	Intermediate height = Full clip height + 10%.
Choice of 102mm or 152mm clips to suit 6mm thick blades, or IGLU clips for double glazed blades.	
"Off-Standard" Gallery Features at NO EXTRA CHARGE:	
Right hand control (viewed from inside).	
Low Profile Handle, Ring Handle or A6 Remote Handle.	
Variable handle position (not available with Innoscreen Window Systems).	
Blade opening restricted to 80mm or 100mm.	
Colour matched clips and handles for all standard colours (all IGLU Clips are Black).	
Powerlouvre Gallery (refer separate table in price list).	
All IGLU Clips are Black.	

STEP 2: Decide Whether to Include the Stronghold® System

The Stronghold System mechanically locks blades into the Altair Louvre Clips and may be required to comply with the fall prevention requirements included in the Building Code of Australia. Add the Stronghold Premiums (see page 15) to the price of the window system.

STEP 3: Select the Louvre Blades – Check the AS1288 “Glass in Buildings” requirement

1. Select the blade material and the price per lineal metre (See Page 16). Multiply the price per metre (X) the frame width (X) the number of blades in the frame.
2. Add this price to the frame price.

STEP 4: Select Reveals, Couplers or Cover Plates

Determine the perimeter of the frame and multiply that measure by the reveal price (See Page 15). Exact Reveal width and Flashing requirements should be specified at the time of order placement.

A maximum of two Window Systems is recommended per coupled assembly.

MAXIMUM WEIGHTS

Maximum weight of individual items supplied cannot exceed 70Kg. Therefore:

- Blades may have to be packed separately to the frame.
- Supply of fixed lite glass may be declined (fixed lite bays would need to be glazed on your premises or on site).
- Supply of very large frames may be regretfully declined.

IMPORTANT NOTES:

- Window System specific notes located below system pricing (Please read).
- All Breezway Systems are viewed inside-looking-out, due to the nature of louvre controls.
- Maximum individual painted frame width is 4,000mm.
- Maximum individual Easyscreen Window System width in stock 25µm Clear Anodised, Pearl White Gloss or Black Satin is 5,700mm.
- Maximum individual Innoscreen and SL2 Window Systems width in stock 25µm Clear Anodised, is 5,700mm.
- Available IGLU Easyscreen bay widths limited by stock IGLU blade sizes.
- Frames over these dimensions will need special arrangements, please contact Breezway.
- Maximum individual frame height for normal freight is 3050mm. Frames over this height will require special arrangements and quoting by Breezway.
- Frames that exceed 2,300mm in both height and width will need to be sent KDC or require special arrangements and quoting by Breezway.
- Pricing is for fully assembled.
- Window System prices do not include blades (See page 16 for details).
- If the Stronghold System is required, the Stronghold Premium should be calculated and added to Window System pricing.
- Stronghold System Off-Standard height limitations apply for the following:
 - Easyscreen Window System: Std height + 24mm through to Std heights + 35mm is unavailable.
 - Innoscreen Window System: Std height + 26mm through to Std heights + 37mm is unavailable.
 - SL2 Window System: Std height + 19mm through to Std heights + 30mm is unavailable.
- Single Glaze and Double Glazed Fixed Lite combinations are available in select thicknesses.
- Unglazed fixed lite frames will be supplied with glazing wedge to suite but will not be supplied with foam-tape, due to this being affixed to glass before glazing. All double glazed configured frames will be supplied unglazed.

Breezway supply the following glazing wedges:

- 32-68mm glazing wedge for 5mm and 6mm glazing.
- 32-110mm glazing wedge for 18mm double glazing.
- 32-95mm glazing wedge for 20mm double glazing.
- 28-50mm glazing wedge for 24mm double glazing.

Breezway recommend the following foam tape dimensions:

- 3.2mm x 12mm foam-tape for 5mm glazing and 20mm double glazing.
- 1.6mm x 12mm foam-tape for 6mm glazing and 24mm double glazing.
- 4.8mm x 12mm foam tape for 18mm double glazing.

- All Breezway Window System Fixed Lites are glazed internally.

POWERLOUVRE™ WINDOW NOTES

- Off-Standard Heights between 6mm and 42mm greater than a standard frame height are not available for 152mm Powerlouvre Windows.
- Off-Standard Heights between 1mm and 5mm below a standard frame height are not available for 102mm Powerlouvre Windows.
- Off-Standard Heights between 6mm and 44mm greater than a standard frame height are not available for 102mm Powerlouvre Windows.
- Off-Standard heights are not available for IGLU Powerlouvre Windows.
- Minimum bay width for 2-9 blade high Powerlouvre is 400mm.
- Minimum bay width for 10-18 blade high windows is 500mm.
- Powerlouvre Window System prices do not include transformers (see page 16 for details).
- Powerlouvre Window Systems are provided with 1m of cabling for power and control by electrician. If additional wiring is required, it is recommended this be advised and supplied by the electrician.

BREEZWAY

Bulk Lead Time Volumes

To achieve lead times, orders commence production throughout the day. Each process – cut, paint, assembly, packaging and despatch is scheduled over the lead time that has been allocated to your order.

Once the order has commenced production it will be too late to make changes to the order without costs being incurred.

Product	Bulk Order Quantity Lead Time To Be Confirmed
Easyscreen & SL2 Surround Frames	≥ 30 Bays
IGLU Easyscreen Frames	≥ 20 Bays
Security Easyscreen Frames	≥ 20 Bays
Innoscreen Surround Frames	≥ 15 Bays
Aluminium Blades	≥ 250 Blades
Stronghold Blades under 1,000mm	≥ 250 Blades
Stronghold Blades over 1,000mm	≥ 150 Blades
Heat-Soaked Blades	≥ 250 Blades
152 EnergyTech Grey	≥ 250 Blades
Sub Head and Sill	≥ 50 Sets

NOTE: All standard lead times based on Standard and Secondary finishes. Special/Non-Stock and High-Performance finishes will require additional time. Unique and DecoWood finishes (other than WRC) will depend on supplier lead times.

++ Complement colour to Bluescope Steel's COLORBOND colour range.
Selected finishes of identical colour and gloss levels may be used interchangeably.

NOTE:

- Interpon D1000, Interpon D1010 and Dulux Duralloy powders.
- Clip & handle colours in Black, White or from the standard range only.
- No colour premium.

- All stocked colours from the Interpon D1000, Interpon D1010, Interpon TC, Dulux Duralloy, Dulux PG288 and Dulux Precious ranges.
- A non-discounted colour premium of \$216.00 is applied per order.
- Clip and handle colours are only available in black, white or from the standard colour range only.

- All stocked colours from the Interpon D2015 Ultriva, Dulux Duratec, Dulux Armourspray and Dulux Electro ranges.
- A non-discounted colour premium of \$216.00 per order plus a 20% premium is applied.
- Clip and handle colours are only available in black, white or from the standard colour range only.
- Warranty periods for high performance ranges must be applied for approval from Dulux or Interpon. Applications must be made using project and site details and have a Warranty Certificate issued by Dulux or Interpon, prior to placement of orders.
- If a Warranty Certificate is not issued by Dulux or Interpon, then maximum warranty period will be 10-year Breezway Warranty.

- Lead time is dependent on supplier's lead times and is quoted on application.
- Unique Finishes include Anodised finishes (excluding Clear Anodised 25 micron), Dulux Alphatec, Dulux Surreal Effects and Made-To-Order powders.
- Colour premium is dependent on finish type & quantity.
- Clip and handle colours are only available in black, white or from the standard colour range only.

Textured powdercoat finishes like Interpon Sable Collection, Interpon Ripple Series, Dulux Surreal Effects, Dulux Scylla and Dulux Mannex may result in reduced water penetration resistance and air infiltration performance in some situations. Please contact Breezway if you are intending to use a textured finish.

- High performance marine grade photo image finish.
- Standard lead time on DecoWood Western Red Cedar blades, channel and weatherstrip.
- Lead time on other DecoWood colours is dependent on supplier's lead times and is to be confirmed by Breezway.
- A non-discounted colour premium of \$216.00 is applied per order for DecoWood Western Red Cedar channel and weatherstrip. All other prices are on application.
- Clip and handle colours are only available in black, white, from the standard colour range.

It is the customer's responsibility at order placement to ensure that the product satisfies AS1288 - 2021.

RESPONSIBILITIES OF THE FABRICATOR

- Combinations of toughened and annealed glass blades are possible within Altair Louvre Windows. The requirements of AS1288 should be considered when ordering glass blades as some locations in the building may require all blades to be toughened (eg wet areas, besides doorways) and some locations in the building may require only the lower blades (which have a higher risk of human impact) to be toughened. Mixtures of toughened and annealed glass blades are illustrated in the tables below.
- All quotes and orders require a Serviceability Limit State Wind Pressure, Ultimate Limit State Wind Pressure and Water Pass Rating and confirmation of the building type, or a N or C rating (e.g. 2200Pa SLS / 3300Pa ULS / 300Pa Water Pass or N5) to ensure that correct deflection allowance as per AS2047-2014 are applied. If this information is not supplied our customer service team will be unable to process the order until further clarification is received. This may cause a delay in the timely supply of the order.
- Fixed lite glass type, size and shape must conform to the requirements of AS1288-2021. Additional limitations of fixed lite sizes may be applied by Breezway due to manufacturing capabilities, or product performance limitations. The type and size of glass specified will be the responsibility of the Fabricator.
